The service includes:

- Evaluation of the application and accompanying documentation;
- Issuing of a certificate.

The single safety certificate shall be issued to those Railway undertakings and shunters which have established their safety management system and are able to operate safely in the intended area of operation.

In the pre-engagement, upon the submission of the application, the State Railway Technical Inspectorate provides an opinion on the stages of issuing of the single safety certificate and the necessary documents.

The submission of applications and documents, the request and circulation of all information, as well as the notification of decisions to the applicant shall take place through the [One Stop Shop](#).
